2. Business

- The lease for the use of the school grounds has been renewed for the period July 2016 to June 2017. Unfortunately no progress has been made on securing a storage facility on the school grounds. The club needs to address the issue of an increase in the number of target butts and as a consequence look at a larger trailer. Preliminary investigations suggest that a trailer 10ft x 5ft, caged, dual axle and with brakes can be purchased for approximately \$3,500.00. Whilst the current trailer can accommodate extra targets there is a weight issue as the trailer is very full and the carrying capacity of the trailer is listed as 370Kg. An estimation of the current loading places it at 360Kg.

Resolution;

The president be authorised to purchase a new 10ft x 5ft caged, dual axle, braked trailer for the club. The authorisation is limited to a maximum value of \$3,500.00.
